1. GOING CONCERN AND NATURE OF OPERATIONS

International Gold Mining Limited (the “Company”) was incorporated in Victoria, Australia on February 21, 1996 and currently resides in Brisbane, Australia. Its principal business activity is natural resource exploration, presently focused on mineral interests in Australia and Tanzania.

For the three months ended March 31, 2009 the Company incurred a net loss of \$157,070 (March 31, 2008 – Net Profit \$242,155), and for the nine months ended March 31, 2009, the Company incurred a net loss of \$990,643 (March 31, 2008 - \$518,224). At March 31, 2009 the Company had a deficit of \$14,656,738 (March 31, 2008 - \$12,608,732).

These consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to continue to raise adequate financing and to commence profitable operations in the future.

There can be no assurance that the Company will be able to continue to raise funds in which case the Company may be unable to meet its obligations. Should the Company be unable to realize its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the balance sheet.

2. SIGNIFICANT ACCOUNTING POLICIES

The interim period consolidated financial statements have been prepared by the Company in accordance with Canadian generally accepted accounting principles. All financial summaries included are presented on a comparative and consistent basis showing the figures for the corresponding period in the preceding year. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements. Certain information and footnote disclosure normally included in financial statements prepared in accordance with generally accepted accounting principles has been condensed or omitted. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company’s latest annual report. In the opinion of the Company, its unaudited interim consolidated financial statements contain all adjustments necessary in order to present a fair statement of the results of the interim periods presented.

Accounting Policies Implemented in 2008

Effective January 1, 2008, the Company adopted Section 1535, Capital Disclosures of the Canadian Institute of Chartered Accountants’ Handbook (“CICA”) Handbook. This section establishes standards for disclosing information about an entity’s objectives, policies and processes for managing capital. This section has been adopted effective January 1, 2008. See Note 8 for additional details.

International Financial Reporting Standards (IFRS)

In February 2008, the Canadian Accounting Standards Board confirmed that publicly accountable enterprises will be required to adopt IFRS for fiscal years beginning on or after January 1, 2011, with earlier adoption permitted. Accordingly, the conversion to IFRS will be applicable to the Corporation’s reporting no later than the first quarter of 2011 with restatement of comparative information presented.

The Company is currently evaluating the future impact of IFRS on its financial systems and reporting and will continue to invest in training and additional resources to ensure a timely conversion.

3. CAPITAL STOCK (cont'd...)

Stock options

The Company, in accordance with the policies of the TSX Venture Exchange, is authorized to grant options to directors, employees and consultants, to acquire up to 10% of issued and outstanding common stock. The exercise price of each option equals the market price of the Company's stock as calculated on the date of grant or the \$0.10 minimum as permitted under exchange policy. The options can be granted for a maximum term of 5 years. Options granted to employees, directors and officers vest fully four months after the grant date. Options issued to consultants must vest in stages over 12 months with one quarter of the options vesting in any three month period.

The fair value of all share purchase options are expensed over their vesting period and estimated term, with a corresponding increase in contributed surplus.

Upon exercise of share purchase options, the consideration paid by the option holder, together with the amounts previously recognized in contributed surplus, is recorded as an increase to share capital.

Stock option transactions and the number of stock options outstanding are summarized as follows:

	March 2009		June 2008

3. CAPITAL STOCK (cont'd...)

Stock-based compensation

During the year ended June 20, 2008 the Company granted 8,500,000 stock options to directors, officers and consultants.

The company measures the cost of cash-settled share based payments at fair value at the grant date using the Black-Scholes formula, taking into account the terms and conditions upon which the instruments were granted.

8,000,000 options were issued in March 2008 at a fair value of \$0.06 per option, for a total value of \$472,240.

500,000 options were issued in June 2008 at a fair value of \$0.24 per option, for a total value of \$119,486.

6. FINANCIAL INSTRUMENTS

The Company's financial instruments consist of cash, receivables, accounts payable and accrued liabilities and loans payable. The fair value of these instruments approximates their carrying value, unless otherwise noted.

Currency

The Company is exposed to financial risk arising from fluctuations in foreign exchange rates and the degree of volatility of those rates. The Company does not use derivative instruments to reduce its foreign currency risk.

Interest rate risk

The Company's exposures to interest rate risk arise predominantly from assets and liabilities bearing variable interest rates as the Company intends to hold fixed rate assets and liabilities to maturity.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet the obligations associated with its financial liabilities. Liquidity risk management serves to maintain a sufficient amount of cash and to ensure that the Company has at its disposal sufficient sources of financing such as private placement. The Company establishes cash estimates to ensure it has the necessary funds to fulfill its obligations. Obtaining additional funds makes it possible to the Company to continue its operations, and while it has been successful in doing so in the past, there can be no assurance it will be able to do so in the future.

Credit risk

The credit risk in respect to financial assets of the Company which have been recognized in the balance sheet is generally the carrying amount, net of any provision for diminution in value.

7. COMMITMENTS AND CONTINGENCIES

The Company has entered into operating lease agreements for premises. The annual lease commitments under these leases are as follows:

2009	\$ 31,846
2010	43,783
2011	<u>45,172</u>
	<u>\$ 120,801</u>

In order to maintain current rights to tenure to exploration tenements, the Company is required to perform minimum expenditure requirements specified by various governments. The expenditure obligations are subject to renegotiation when application for a mining lease and/or renewal of exploration permits is made. The commitments under these expenditure obligations are as follows:

Not later than one year	\$ 50,520
Later than one year but not later than five years	<u>545,000</u>
	<u>\$ 595,520</u>

8. CAPITAL MANAGEMENT

The capital of the Company consists of the items included in shareholders' equity. The Company's objectives of capital management are intended to safeguard the entity's ability to support the Company's normal operating requirements on an ongoing basis, continue the development and exploration of its mineral properties.

To effectively manage the Company's capital requirements, the Company has in place a planning process to help determine the funds required to ensure appropriate liquidity to meet its operating and growth objectives.

The Company relies on equity financing to fund its exploration programs, and has responded to the recent global financial instability by initiating a strict costs control program. In 2009, the Company expects to generate cash flows from private placements of equity.

9. SUBSEQUENT EVENTS

On April 30, 2009 the Company announced that it had revised the price for issue of incentive stock options to David Taylor, for his services as a director. It was initially announced on March 27, 2009 that 1,000,000 incentive stock options would be granted at an exercise price of \$0.06 per share subject to regulatory approval. The exercise price has been revised to \$0.10 per share in accordance with Exchange policy. The options are exercisable for a 3 year period and subject to a four-month hold period commencing on the date of the grant.
